Architectural Design · October 1966 · p.495

RC - 01834

Research record

01 · THE ITEM

Select image to view full size.

02 · INITIAL RECORD**What's there?**

Eight site plans showing proposed development in relation to railway lines, stations, existing buildings, roads etc.

What attracts attention?

The varied arrangements of elongated, modular buildings in relation to railway infrastructure and existing settlements. The plans suggest different responses to local conditions rather than a single standardised layout.

Recollection · 1967

To be recorded, if recalled.

03 · INVESTIGATION**Questions to investigate**

- * What determines the location, orientation and configuration of the proposed buildings at each site?
- * How do the arrangements relate to railway access, existing settlement and topography?

Further examination

Compare the eight plans to establish which elements remain constant and which vary with local conditions.

Relationships

PTb <-> DTb

Relationship to be investigated, not assumed.
