Designing Buildings Wiki
Article 10,000: An interoperable industry

To celebrate the 10,000th article on Designing Buildings Wiki, Director and co-founder Gregor Harvie takes a look at events that have shaped the industry in the last eight years, and predicts an interoperable future.

The credit crunch, Grenfell, Carillion, Brexit and Coronavirus have left an industry in shock, struggling to develop policies that catch up with events.

Meanwhile technology is quietly breaking down barriers and giving us the data we need to make informed decisions.

Could a continued drive for interoperability deliver construction's Uber moment?
