Architectural Design · October 1966 · p.492

RC - 01831

Research record

01 · THE ITEM

Select image to view full size.

02 · INITIAL RECORD**What's there?**

Description of an additive, timber-framed housing system using prefabricated units.

What attracts attention?

The separation of dwelling units from their servicing systems; the use of adjustable supports on uneven ground; and the range of possible groupings. The text proposes changing occupancy arrangements rather than extending or altering individual units.

Recollection · 1967

To be recorded, if recalled.

03 · INVESTIGATION**Questions to investigate**

- * How does the proposed separation of dwelling, equipment and servicing enable change over time?
- * What determines the choice between the illustrated groupings?

Further examination

Examine the relationship between the modular construction system, site conditions and the different patterns of occupation.

Relationships

PTb <-> DTb

Relationship to be investigated, not assumed.
